

## Waiting period in case you have come into close contact with an infected person

※If you become a close-contact person (close contact with an infected person), please follow the instructions of the public health offices.

※If a family member living with you tests positive, the date of the onset of their symptoms or the date when infection control measures were taken, whichever is later, will be Day 0.

※If negative results are confirmed in the tests using a **pharmaceutically approved antigen qualitative test kit** on Day 2 and Day 3, the stay-home period will be ended on Day 3.

**If you wish to enter the campus from the Day 3, please send a photo of the test kit to "hcc@hcc.naist.jp" and obtain permission to enter the campus from the Health Care Center.**
