

## Confirmed case of new coronavirus infection at Nara Institute of Science and Technology (NAIST)

On May 6<sup>th</sup> one NAIST student described below was confirmed as having been infected with the new coronavirus.

Age: 20' s

Sex: Male

Symptoms: On April 18th (Sun), the public health center notified the student that he was suspected of having been in close contact with an infected person and on the same day he underwent a PCR test. He was diagnosed as "positive" on April 20th (Tue).

However, since this student has not entered the campus since April 9th (Fri), no one came in close contact with him at NAIST.

NAIST' s Crisis Measures Headquarters will continue to take measures to prevent the spread of infection based on the national and prefectural government policies.
